

Package ‘PSS.Health’

July 15, 2023

Type Package

Title Power and Sample Size for Health Researchers via Shiny

Depends R (>= 4.1.0)

Version 1.0.2

Date 2023-07-13

Language pt

Description

Power and Sample Size for Health Researchers is a Shiny application that brings together a series of functions related to sample size and power calculations for common analysis in the healthcare field. There are functionalities to calculate the power, sample size to estimate or test hypotheses for means and proportions (including test for correlated groups, equivalence, non-inferiority and superiority), association, correlations coefficients, regression coefficients (linear, logistic, gamma, and Cox), linear mixed model, Cronbach's alpha, interobserver agreement, intraclass correlation coefficients, limit of agreement on Bland-Altman plots, area under the curve, sensitivity and specificity incorporating the prevalence of disease. You can also use the online version at <https://hcpa-unidade-bioestatistica.shinyapps.io/PSS_Health/>.

PSS_Health 2

Index 4

PSS_Health	<i>This function will start the Shiny application</i>
------------	---

Description

Run locally an interactive Shiny application for Power and Sample Size determination.

Usage

PSS_Health()

Author(s)

Unidade de Bioestatística, Diretoria de Pesquisa, Hospital de Clínicas de Porto Alegre.
